<hr/>		
<hr/>		
<hr/>		
<hr/>		
Can they be repositioned?	Yes	No

Send me a sketch of the shape of the border, along with any photos. Any other material e.g magazine articles will help with the final design.

NOTES. Soil Ph

Different plants require different soil Ph if they are planted in the wrong soil they will not thrive and may even not survive. You will need to buy a kit from a garden centre or DIY store and if it's a large border, test in different areas in the border. Please make sure you mark the area on the sketch.

IF YOU DON'T PROVIDE OR INCORRECT PH INFORMATION WE DO NOT ACCEPT RESPONSIBILITY IF THE PLANTS ARE INCORRECT FOR THE SITE.

If there are any problems please don't hesitate to contact us.
